MELTDOWN v2.0.0   Melt Curve Analysis
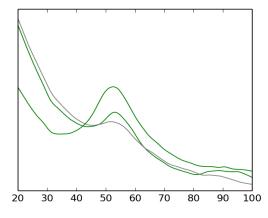

dataSample.txt

Full interpretation of the results requires you to look at the individual melt curves.

The summary graph appears to be unreliable

21% of curves were used in Tm estimations

Average estimation of error is **1.0 C**

Protein as supplied is **not well behaved**

Protein as supplied: Tm = 48.61(+/-1.39)

Lysozyme Control: Passed
No Dye Control: Passed
No Protein Control: Passed

Tms drawn in diamonds may be unreliable
